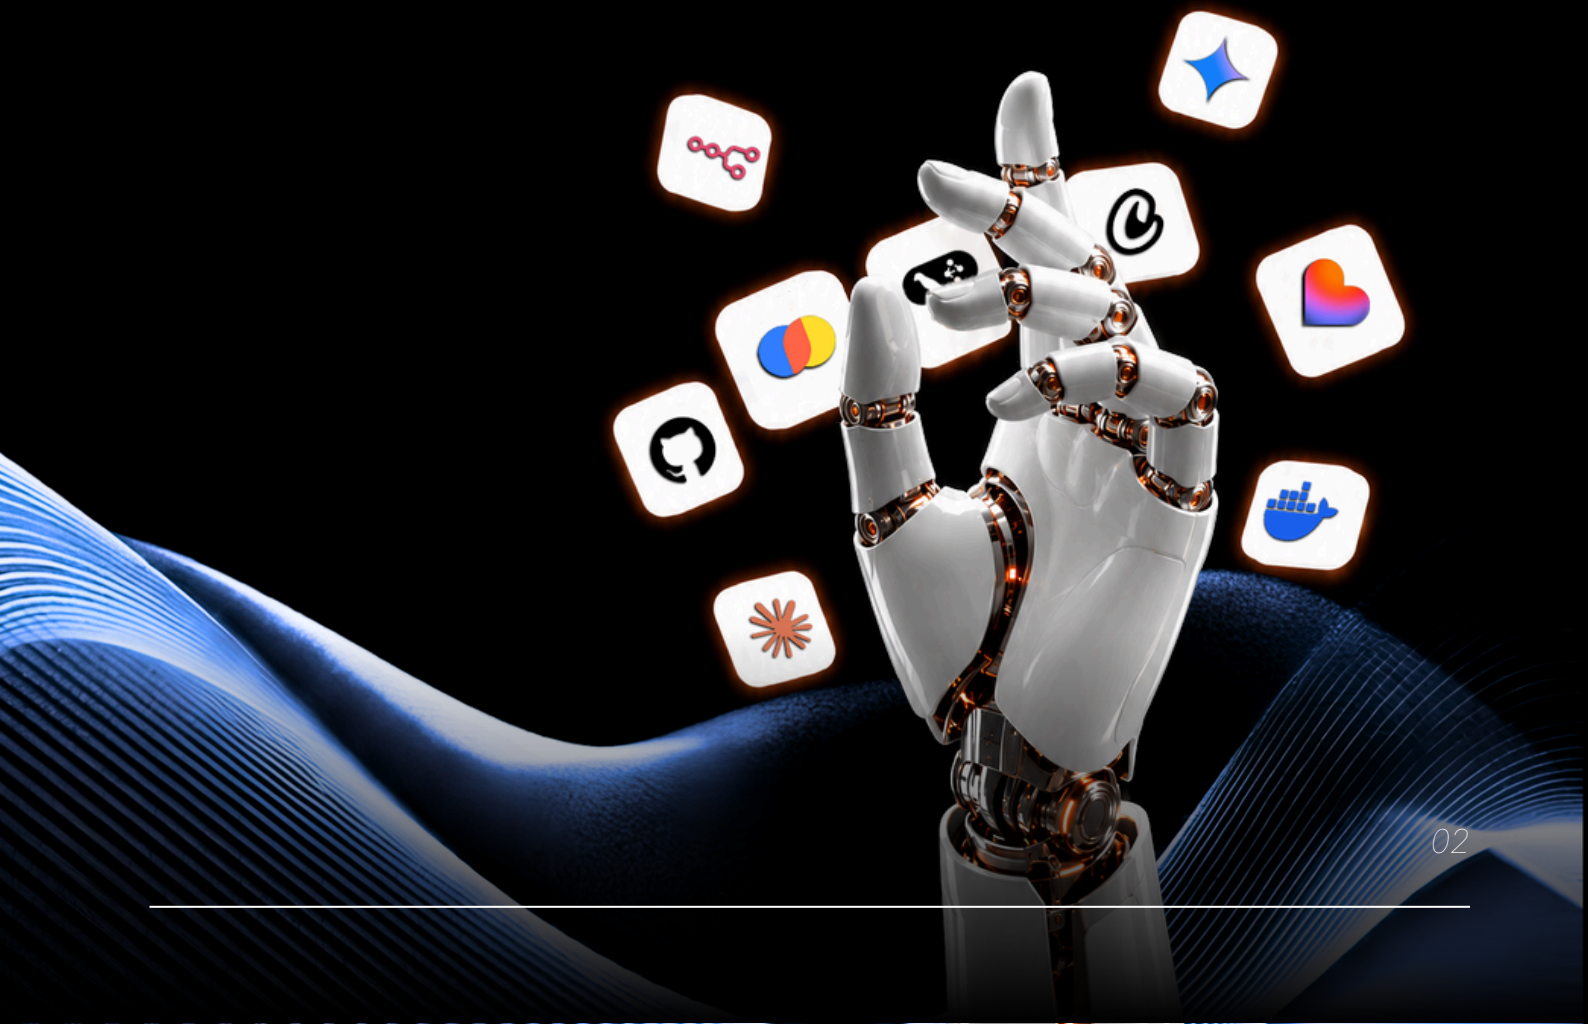
About AcceleratorX

India's build-first AI program - taught by people who ship.

AcceleratorX is a learning company built around one principle: you don't learn AI by watching, you learn AI by shipping. We run cohort programs with a 1:8 mentor ratio, every session ends in a working artifact, and every learner graduates with a public portfolio that hiring managers can audit before the interview.

Our Generative AI & Agent Engineering program — delivered in collaboration with IBM — has been redesigned for 2026 hiring. The new 16-week curriculum is informed by primary research across 25+ competitor programs and the latest LinkedIn India hiring signals.



Why Now · 2026 Signals

The hiring frontier moved. The curriculum moves with it.

300%+

Growth in LangChain & AI agent jobs on LinkedIn India · Jan '25 → Mar '26

34.3%

Of agentic job listings ask for LangChain — the #1 framework

39%

Enterprise MCP adoption · up from <5% in 2024

30–60%

GCC pay premium for GenAI engineers vs adjacent eng talent

Our Generative AI & Agent Engineering program — delivered in collaboration with IBM — has been redesigned for 2026 hiring. The new 16-week curriculum is informed by primary research across 25+ competitor programs and the latest LinkedIn India hiring signals.

Who Should Enroll

One offer. Two tracks. Real value for both audiences.

Everyone goes through 8 weeks of Common Foundations together. From Week 9 you specialise into Tech or Business. AI Build Ninja Saturdays run in parallel for the full 16 weeks.

Business Track

For leaders who want to lead AI in their company. Without code.

PMs, marketers, HR, finance, ops, founders. 5–15 yrs experience. Owns AI adoption — needs to ship outcomes, defend ROI, and prove leadership.

You'll graduate having shipped:

- Department knowledge bot deployed in Flowise
- AI receptionist on a real Indian phone number
- 3 production no-code automations + resume screening pipeline
- 2 specialist agents (support + sales) integrated with tools
- Domain AI playbook for marketing or HR or finance or ops
- 90-day adoption roadmap + ROI model + AI Usage Policy

Program Architecture

16 weeks · 3 phases · 4 streams running in parallel.

Common Foundations builds shared fluency. Specialisation goes deep. AI Build Ninja Saturdays put you on a domain ship every week.

PHASE 1 · WEEKS 1–8

Common Foundations

Common Foundations builds shared fluency. Specialisation goes deep. AI Build Ninja Saturdays put you on a domain ship every week.

All learners

24 sessions

PHASE 2 · WEEKS 9–16

Business Track

No-code agents · Document & support intelligence · Domain AI · Strategy & governance · ROI modelling · Capstone · Business Demo Day.

Leaders

24 + capstone

Cadence
3 live sessions/wk + Build Ninja Saturday

Total live hours
≈ 110 hrs over 16 weeks

Mentor ratio
1 senior AI engineer : 8 learners

Demo Day
12+ industry panelists confirmed

Common Foundations · **Weeks 1–4**

Models, prompts, RAG, multimodal — the real foundation.

1

Week 01

AI Models, the 2026 Stack & Personal AI Stack

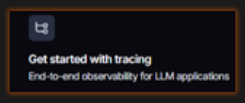
Artifact

Personal AI Productivity Stack — 5 reusable Notion templates.

2

Week 02

Prompt & Context Engineering



Artifact

Employee Onboarding Assistant — 10 adversarial inputs passed, 3 LangSmith iterations.

3

Week 03

LLM Internals + RAG (the Real Foundation)

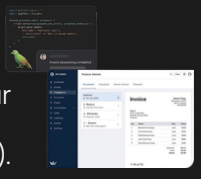
Artifact

Domain Knowledge Chatbot over 20+ docs — deployed to Streamlit, shared with cohort.

4

Week 04

Multimodal & Fine-Tunin Basics



Artifact

30-sec AI promo video for your domain + Invoice Intelligence pipeline (10 invoices → Sheets).

Common Foundations · Weeks 5–8

Voice agents, vibe coding, SaaS launch, AI automations.

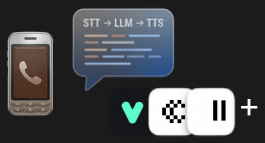
5

Week 05

Voice AI Agents — Real Phone Numbers

Artifact

Doctor Appointment Booking Agent on a real Indian number — books slot, sends SMS confirmation.



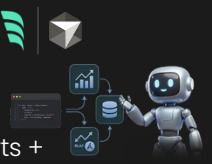
6

Week 06

Vibe Coding I — Terminal & IDE Agents

Artifact

Streamlit dashboard from a CSV — 3 charts + AI insight button — built only via Composer.



7

Week 07

Vibe Coding II — No-Code SaaS Launch

Artifact

Live SaaS — login + DB + AI feature + Stripe checkout + PostHog. Public Vercel URL.

8

Week 08

AI Automations with n8n

Artifact

3 production-running automations — lead enrichment, AI digest, content production.

Common Track outcomes (by Week 8)

Personal AI productivity stack · Production-quality system prompt · Domain RAG chatbot deployed · Invoice intelligence + 30-sec promo video · AI receptionist with real number · Doctor appointment voice agent · Streamlit dashboard via Composer · End-to-end dev cycle via Claude Code · Live SaaS on Vercel · 3 production n8n automations.

Business Track · Weeks 9–10

For business leaders — no-code first, production-rigorous.

9

Week 09 · B

No-Code AI Apps & Voice for Business

Artifact

Department Knowledge Bot · AI Receptionist on real Indian number · 3 production automations.

10

Week 10 · B

No-Code Agents — Document, Support, Sales

Artifact

Procurement Research Agent · Resume Screening Pipeline · 2 specialist agents.

Business Track · Weeks 11–16

Domain AI · Strategy · Governance · Capstone · Demo Day.

11

Week 11 · B

AI for Your Domain

Artifact

Department AI Assistant + 3 AI workflows compiled into a team-shareable playbook.

12

Week 12 · B

AI Strategy & Governance

Artifact

90-day adoption roadmap + 3-year ROI projection + 1-page AI Usage Policy peer-reviewed by 3.

13–15

WEEKS 13–15 · B

Capstone Sprint — 3 Build Phases

Artifact

Working capstone with measured adoption — 3 colleagues using it weekly for 2 weeks.

16

Week 16 · B

Business Demo Day & Graduation

Artifact

Notion portfolio + ROI model + AI Usage Policy + alumni hiring channel access.

Business Track outcomes

Department knowledge bot · AI receptionist with real Indian number · 3 production no-code automations · Resume screening pipeline · 2 specialist agents (support + sales) · Domain AI playbook · 90-day adoption roadmap · ROI model · AI Usage Policy · Capstone deliverable + business panel demo · LinkedIn case study.

Business Track · **Phase 1-2**

Detailed 25-Session - Business Track Curriculum

Phase 1

AI Literacy, Prompting & Productivity

Session 1: GenAI for Non-Coders - What It Is and How to Use It

Session 2: Prompting Foundations for Business Users

Session 3: Advanced Prompting & Prompt Workflows

Session 4: AI Productivity Operating System

Phase 2

Department-Wise GenAI Use Cases

Session 5: AI for Research, Strategy & Decision Support

Session 6: AI for Sales, CRM & Lead Management

Session 7: AI for Marketing, Content & Brand Communication

Session 8: AI for HR, Operations, Finance & Admin

Business Track · **Phase 3-5**

Phase 3

Custom AI Assistants & Knowledge Bases

Session 9: Building No-Code Custom AI Assistants

Session 10: Knowledge Base Design for Non-Coders

Session 11: Building AI Knowledge Assistants

Phase 4

Vibe Coding for Non-Coders

Session 12: Vibe Coding Foundations for Non-Coders

Session 13: Building Websites, Landing Pages & Forms with AI

Session 14: Building Internal Tools & Dashboards with AI

Session 15: Vibe Coding Review, Testing & Improvement

Phase 5

No-Code Automation & AI Agents

Session 16: No-Code Automation Fundamentals

Session 17: Building Simple No-Code Automations

Session 18: AI-Powered Business Automations

Business Track · **Phase 5-7**

Session 19: No-Code AI Agents

Phase 6

No-Code Multi-Agent Systems & Business AI Workflows

Session 20: Multi-Agent Systems Without Coding

Session 21: Building a No-Code Multi-Agent Workflow

Session 22: Business Workflow Automation Lab

Phase 7

Governance, ROI, Capstone & Demo Day

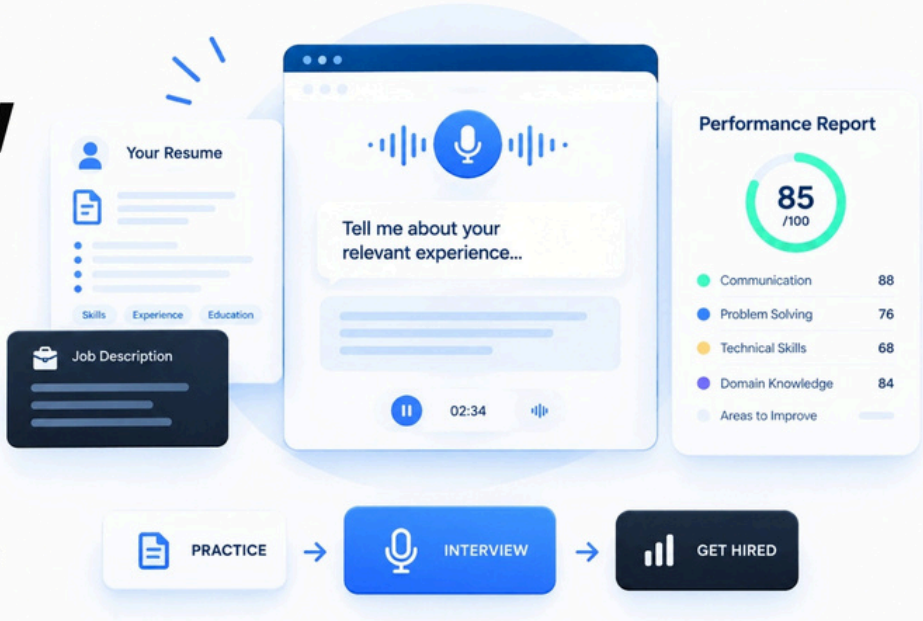
Session 23: Responsible AI, Privacy, Security & Output Validation

Session 24: AI Adoption, ROI & Capstone Build Clinic

Session 25: Demo Day, Portfolio & Career Readiness

AcceleratorX

AI Interview Prep



Get Hired Faster.

Prepare for the Right Role, the Right Way.

You can complete the same course, learn the same skills, and still get a different interview outcome.

Without Interview Prep	With Interview Prep
Prepare for generic questions	Prepare for the right company & role
Know what to answer	Know how to answer under pressure
Practice alone	Practice through live interviews
Find gaps in the real interview	Find gaps before the real interview
Hope you're ready	Know where you stand

92%

92% of learners who completed 3+ mock interviews progressed to the next interview stage.

Success Stories

Aarav Sharma — OLX

Priya Mehta — Deloitte.

Rahul Verma — CRED

What Makes It Different

Company-Specific
Prepare for your target company & role.

Domain-Specific
Master your domain expectations.

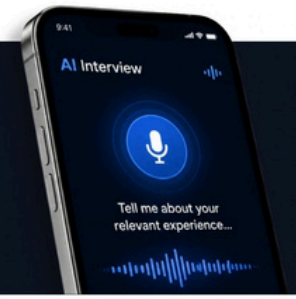
Your Resume + Their JD
Questions based on your resume & JD.

Live Interview
Real-time interviews with follow-ups.

Know Your Gaps
Get your score, gaps & next steps.

From Practice to Readiness

Upload Resume → Add JD → Take Interview → Get Report → Improve → Practice Again



Don't let the real interview be your first attempt.

Practice more. Improve faster. Increase your chances of getting hired.

Scan to start Interview Prep.

Prerequisites

Prerequisites

No coding knowledge required

Basic computer usage

Comfort with browser-based tools

Basic email, document and spreadsheet usage

Willingness to experiment with AI tools

Basic communication ability

AI Build Ninja

15 Saturdays. 15 industries. 15 public ships.

Every Saturday for 15 weeks: 30 min domain primer from an industry expert · 2 hr build · 1 hr cohort demo + vote. By 10:30 PM IST every learner posts a public Loom + GitHub link. By Demo Day you have a 15-vertical portfolio that no other Indian program produces.

AcceleratorX Labs

2,700+	1,700+	Real
Success Stories	Companies	Projects Built

Solve real-world business problems.

Build real-world projects.

Turn what you learn into working projects you can actually show, explain, and deploy.

What you will walk away with

A Project You can Show
Build a real solution for a real business problem.

Proof You Can Build
Get reviewed. Prove your understanding in a live viva.

A Sronger Portfolio
Turn projects into proof of your skills.

End-To-End Building Experience
Go from problem → solution → code → review → deployment.

Build in Your Own Environment
Build in the tools you'll actually use.

A Shipped Project
Deploy your project to BuildrX in one click.

The Support You Get

Step-By-Step Building Guides
Know what to build and what to do next.

Coding Copilot
Get help while coding, debugging, and solving problems.

Coding Review
Understand what works, what doesn't, and how to improve your code.

Live Viva
Defend your work and prove you understand what you built.

Learn → Build → Review → Defend → Ship

Don't just finish a course. Leave with something that proves what you can do.

Real business problems | Real projects | Your environment | Coding Copilot | Live viva | One-click deployment

Learners

Real people.
Real career shifts.
Real results.

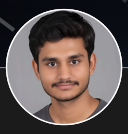
Professionals like you are already making the shift. Hear directly from our learner who transitioned into an AI-led career

Nikhil D Associate PM

"From idea to interface — shipped my first product and applied product principles in real time."

Kamayani Chaliki Founder at Skinbuddy

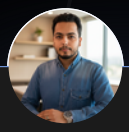
Built Rasa AI to simplify personalized nutrition, turning complex meal planning into an intelligent, adaptive experience.



Devesh Kumar Founder at VaidhyaTechAI

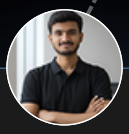
"A single question changed my product thinking: Who is this for, and what exact problem am I solving?"

2700+ Success Stories



Srikant Pandey AI QA Engineering Lead at TO THE NEW

"Built Rasa AI to simplify personalized nutrition — turning complex meal planning into an intelligent, adaptive experience."



Dhruv Dave Prompt Engineer at Alight Technologies

Understood how AI systems actually work, from agents and workflows to production-ready builds.

Sourabh Kalra HR Analyst

"Built ContextForge — a web app that transforms average prompts into high-performing, context-rich instructions in seconds."
